BS.Player PRO is one of the most popular multimedia players, famous for its modest UI and excellent tone quality. It provides rich media play functions and audio/video formats support.

What is worth mentioned is BS.Player's desktop-playing and its video scaling functions. So, when watching a video, we can not only watch the playing video in the form of wallpaper (this is really wonderful for chatting while watching a movie, but can also adjust the video window size by slipping mouse at will.

// Key Features //

- Thousands of online radios
- YouTube Support
- Playlist Support
- Display subtitles
- BS.Media Library
- Multilingual
- Resizable movie window
- Drag & Drop
- Multiple volume rar archive support
- Resolution Changing
- Fully Skinnable
- Capture frame from video and save it to jpeg image
- AVI files with more than 2 audio streams supported
- Supports embedded subtitles/chapters
- External audio file support
- S/PDIF output supported for AC3 files

- INI files
- Custom playback modes (Repeat All, RepeatRandom)
- Display videos directly on your Desktop
- Playback of AVCHD (Advanced Video Codec High Definition) format used in digital tapeless camcorders.
- Command line support
- Pan scan and custom pan-scan option
- Custom aspect ratios

// Compared with KMplayer //

Just two highlights of BS.Player PRO are enough to balance and then beat **KMplayer**:

1. Super powerful audio and video decodes supporting, which is never show weakness to KMplayer
2. Just play a video which you ever played using KMplayer or any other one but with the unsatisfactory quality, you will have a surprising discovery – the video can be automatically optimized to its best clarity and quality immediately!
